## ABOUT ME

I am a former mechanical design engineer and in November 2021 I changed my career path because I was really impressed with how this industry works. At the beginning I wasn't sure which part of the IT industry to choose, but a good friend told me about Web development. So, I started to learn HTML, CSS and JavaScript. After a while, I started to create web applications in React and since then I have been improving my portfolio and my knowledge.
